

Wall Repointing

Brick pointing is the most effective way of restoring the condition and physical appearance of a building structure and it forms an essential part in overall and ongoing building maintenance.

Among other advantages of brick pointing, it will:

- Repair the structural integrity of your building's brickwork
- Ensure weatherproofing in your walls
- Restore the overall appearance and brickwork of your home
- Maintain or significantly increase the overall value of your home or property
- Reduce any ongoing maintenance on your brickwork

Repointing will also aid with:

Conservation - maintaining the original character of older (listed) buildings

Visual appeal - keeping more modern buildings looking good and holding their aesthetic value

Pollution damage - City properties suffer from the effects of pollution from all forms of transport as well as everyday use of fossil fuels

Property value - first impressions count! If your property doesn't look up to scratch, it is immediately devalued

Saleability - as above, but compounded if a survey shows your property performance to be sub-standard

Roofing Services

If your roofing is in need of maintenance, repair or even outright replacement, then we are the people for you.

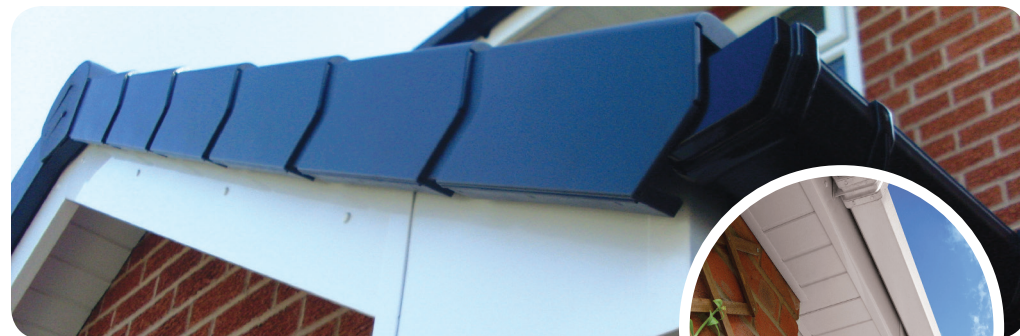

Our roofing service caters for the needs of all types of roofing, whether you have tiles or slates, with each service available at a very competitive price. Our roofing work delivers lasting results and reliability, meaning you can enjoy peace of mind that your new or refurbished roof is of the highest standard.

We can carry out any roof repairs and remedial work to your property. Loose tiles are a potential hazard which need to be attended to immediately and a leaking roof if not attended to can cause damp problems and increase the damage to your property. We can also attend to any leadwork that may need to be repaired.

Protect your property and ensure your roof is in a safe state of repair. Our experienced team can visit and provide a survey and assessment of the condition of your roof. No job is too small.

UPVC Roofline

Replacing UPVC fascias, guttering & soffits to your home is a cost effective way to improve the appearance and increase the value of your home. We use quality UPVC products which are low maintenance, economical and long lasting.

Modern UPVC replacement fascia boards, soffit boards and guttering can be replaced quickly and with little disruption. A choice of styles and colours are available to suit your property.

It is important to keep all guttering clear as it plays a vital role in the maintenance and protection of your home. Any build up of leaves and debris can result in roof damage, blockages and rainwater overflow increasing the risk of internal damp and mould growth.
